

ALEKHYA DAMA

damaalekhya@gmail.com · +91-6309575691 · <https://www.linkedin.com/in/alekhya5/>

Education

Lovely Professional University

Bachelor of Technology – Computer Science and Engineering

CGPA: 6.98 (Current)

Punjab, India

Sep 2022 – May 2026

Skills

Programming Languages: Java, SQL, HTML5, CSS3

Backend & Core Engineering: Spring Boot, RESTful APIs, Multithreading, Socket Programming, Exception Handling

Computer Science Fundamentals: Data Structures & Algorithms (DSA), Object-Oriented Programming (OOP), DBMS, Computer Networks

Problem Solving: 400+ DSA problems solved across LeetCode, CodeChef, and HackerRank

Tools & Platforms: Git, GitHub, Maven, VS Code

Experience

Jr Engineer Intern — High Flows IT Solutions Pvt Ltd

Jan 2026 – Present

- Executed root-cause analysis of software regressions and production anomalies, optimizing system runtime efficiency.
- Deployed automated unit testing and validation protocols to eliminate systemic edge-case defects prior to build releases.
- Remediated architectural bottlenecks in legacy service modules, significantly stabilizing software release velocity.

Java Programming Intern — CodTech IT Solutions Pvt Ltd

Jan 2025 – Mar 2025

- Engineered 3+ high-performance Java sub-systems utilizing decoupled architectural patterns to maximize maintainability.
- Formulated deterministic testing scripts and validation matrices to ensure execution predictability across distributed environments.
- Partnered with cross-functional staging teams to execute continuous integration (CI) workflows and verify secure API integrations.

Projects

Multithreaded Client-Server Chat Application

Java, Sockets, Multithreading

<https://github.com/alekhyadama2003/-MULTITHREADED-CHAT-APPLICATION>

- Architected a fault-tolerant, concurrent client-server system using Java Socket API for low-latency duplex data transmission.
- Managed thread pools and critical section synchronization maps to enforce state management and mitigate race hazards under heavy loads.
- Implemented robust network boundary logic and defensive catch handlers, reducing socket drop frequency.

Finance Dashboard Backend Project

Java, Spring Boot, REST APIs, SQL

<https://github.com/alekhyadama2003/FinanceDashboardBackendProject>

- Engineered a scalable RESTful backend system using Spring Boot to orchestrate distributed transaction management workflows.
- Built 8+ secure REST APIs featuring fine-grained relational layouts, schema optimization, and database indexing.
- Devised global exception handling frameworks and structured interceptors to guarantee clean separation of concerns.

AI-Powered Phone Brand Recommendation System

Java, Apache Mahout

<https://github.com/alekhyadama2003/AI-BASED-RECOMMENDATION-SYSTEM>

- Designed an asynchronous recommendation pipeline with Apache Mahout to run scalable memory-based collaborative filtering computation.
- Transformed unstructured, sparse tracking inputs into uniform dimensional matrix structures to optimize data evaluation bounds.
- Applied strong object-oriented design principles to encapsulate internal recommendation logic against volatile downstream formats.

Coding Profiles

LeetCode (100+ Problems): leetcode.com/u/Alekhyadama/

CodeChef (250+ Problems): codechef.com/users/alekhyadama

HackerRank (50+ Problems): hackerrank.com/profile/damaalekhya

Technical Courses / Certifications

- Generative AI & Prompt Engineering – Coursera
- DBMS & SQL – GeeksforGeeks
